

## **POWER TOOL SAFETY (Product Code: CS5005)**

### **Course Content**

This training module has a theory component delivered in the training room and a practical component delivered in the workshop utilising tasks that your employees undertake as a part of their duties.

### **THEORY**

- Each participant receives a handbook containing the contents of the session
- An outline of general safety precautions that should be undertaken
- Detailed explanation of grinder and drill safety principles
- A group discussion of past accidents and how they could have been prevented
- Detailed explanation of the regulatory inspection and maintenance requirements

### **PRACTICAL**

- As a group a practical assessment of some of the power tools that are used on your site, which includes hazard identification and control

### **OBJECTIVES**

- To identify the level of competence of each person operating power tools
- To remove complacency and apathy and concern in relation to the inherent risks associated with this process
- To achieve an awareness and respect for the potential for this task to cause serious injuries to all involved

### **OUTCOMES**

- To identify unsafe work practices
- To identify and assess hazardous work practices
- To use the correct equipment for the process involved
- Observe all regulatory requirements
- To report all incidents and faults to the designated person

### **Occupational Health and Safety**

State and Territory regulations all identify the necessity to provide training to employees to achieve a safe working environment. Since 1994 3D Safety Services has been delivering training programs that have assisted clients achieve compliance to the regulations.

### **Quotation**

Quotations are prepared on an individual basis. If you would like to discuss your training requirements please contact us and we will arrange for a consultant to call you. All consultants are employees of 3D Safety Services Pty Ltd.
