

INCIDENT INVESTIGATION PRINCIPLES

Course Content

This unit covers all aspects of investigating accidents in the workplace and the systems used to identify the key contributing factors to the accident occurring. The session includes a theory component covering the specific processes and a practical group exercise undertaking a mock accident investigation.

THEORY

- Each participant receives a handbook containing the contents of the session
- An outline of the key components of an accident investigation
- Detailed explanation of the legislative requirements of reporting workplace accidents.
- An outline of how to conduct an interview and develop a narrative using interview records
- Explanation of how to analyze an accident applying the Systems Model of Accident Causation (SMAC) process
- A questionnaire to assess each trainee's retention of the information presented

PRACTICAL

- As a group undertake a mock accident investigation of a workplace accident

OBJECTIVES/OUTCOMES

- To identify the level of competence of each person to investigate a workplace accident
- To understand all steps required to complete an accident investigation
- To understand and identifying the key contributing factors of an accident
- To understand and identify the legislative requirements of reporting workplace accidents
